PR1400 silver

THE RED BUTTON

This security door bar is especially suitable for side doors and does not even require a cylinder.

Side doors, such as cellar, storage or garage doors, are popular entry points for burglars. The security door bar was specially developed for use on these doors. It is suitable for widths of 85 to 100 centimetres. The best part: The model comes without a key. The latch is operated from the inside via two red push buttons. However, a missing key does not mean a lack of security. With its special latch, the product closes reliably and has a high resistance.

Technologies

- Secures the door over the whole width
- Heavy duty wall anchors for maximum strength
- For door widths from 850 - 1 000 mm

Operation and use

- Suitable for inward opening doors
- The PA1014 mounting set is available for outward opening doors
- Operation from inside only

Variants

- Color: Silver
