INTEGRATION IN LOCKING SYSTEMS

Our 86 Titalium™ can be easily integrated into existing locking systems.

Secure your switch cabinets, doors, gates, lockers or sheds consistently against break-in attempts with this robust padlock. The solid lock body is made of TITALIUM™ special aluminium, the hardened steel shackle is equipped with NANO PROTECT™ coating. The lock is supplied without a lock cylinder. Commercially available Europrofile door half cylinders can be installed in the padlock with a conventional hexagon socket wrench in order to integrate it into already existing locking systems.

Technologies

- Solid lock body made from TITALIUM™ aluminium alloy - high security with low weight
- Hardened steel shackle with NANO PROTECT™ plating for extreme corrosion resistance
- Customary EURO-cylinders can be integrated easily without special tools
- Double bolted shackle
- Possible to integrate into keying systems
- 86TI/55: Key retaining or automatic locking (depending on position of cam)
- 25°: Automatic locking (only for adjustable strike plates)
- 45°: Key-retaining
- 86TI/45: Key retaining

Operation and use

- To secure valuables/ goods of greater value or at a high risk of theft

86TI/45 without cylinder

Seite 2 von 2
