

SAFETY LOCK

With our padlock 72/30 for industry and trade you create more security at the workplace.

Our padlock 72/30 is an extremely heat-resistant padlock in various colours and is a good addition to the 74 safety locks. The 72/30 is very suitable as a supplement to the 74 safety locks. Whether aluminium, stainless steel or high-quality steel, the right choice of shackle can be made for all requirements. It can also be combined with the 74 within a locking system. The 72/30 clearly contributes to the protection of your employees. On the one hand, through key retaining: The key can only be pulled out when the padlock is actually locked. This protects against unauthorised access. Secondly, through the ability to assign, because eight different colours ensure clear organisation and prevent confusion. In addition, supporting the different colours, our high-quality and clearly legible laser engravings can make it obvious which person or purpose is associated with the individual padlock.

Technologies

- Very lightweight and yet robust thanks to its aluminium body
- With key retention for increased safety
- Resistant eloxal layer provides good corrosion protection

Variants

- Available in eight different colours
-

72/30HB50 black
