

Chain 10KS200 black

Chain up objects

Padlocks in combination with cables and chains provide suitable protection for a variety of objects.

High-security chains with hardened staples aren't just for securing bikes. They can also secure ladders, garbage cans, and other objects outside the company. Cables and chains also offer versatile security options in public areas - from the chairs outside cafés to the machinery on the construction site.

Technologies

- Security chain made of special hardened steel
- Fabric sleeve prevents paint work and chrome from damage
- Chains in barrels: Customized lengths available
- Top security against all types of aggressive attacks

Operation and use

- Meets special requirements of insurance companies
