

TRUST THE ORIGINAL

Our Diskus® 24/70 padlock has proven itself even in adverse weather conditions.

The round design with narrow shackle opening and the welding seam ensure solid safety! The Diskus® 24/70 padlock protects your valuables stored in trucks, vans, or basements or behind factory gates, for example. The lock is made of stainless steel inside and out, and the shackle is made of special hardened steel, which makes it particularly resistant to picking. The seam that holds the two stainless steel housing pieces together is also hand-welded on every Diskus® 24/70, which ships from our production facility in Germany. This means that the two halves cannot be easily broken apart and the Diskus® secures your valuables and items very well. Two keys are included in the scope of delivery.

Technologies

- Round shape plus narrow shackle opening makes it difficult to access with heavy-duty tools
- Shackle made from hardened alloy steel
- Ideally used with ABUS Diskus® Hasp 140: virtually impossible to attack shackle
- Additional protection against sawing
- Sophisticated welded seam for highest break resistance
- Precision pin tumbler cylinder
- Made in Germany
- 2 keys

Operation and use

- To secure valuables/goods at a medium risk of theft

Technical data - Diskus® 24/70

Depth e	28 mm
Height f	70 mm
Horizontal clearance b	20 mm
