

EXCLUSIVE HANDCUFF LOCK

What looks like classic handcuffs at first glance is a special security device from ABUS with a deterring effect on thieves. The hardened steel construction of the e-scooter and bike lock will remind thieves to keep their hands off other people's property.

The robust Chain Claw 10 is the launch product for a new type of lock: the handcuff lock. With a 7 millimetre diameter, 10 centimetre long, specially hardened steel chain, the bike lock provides convenient security in the ABUS quality users are familiar with. The clamps can be rotated 360 degrees thanks to integrated joints, and are therefore extremely flexible. In addition, they have scratch protection for optimal protection of frames on bicycles and scooters. To open the clamps without a key, enter a personally selected 4-digit opening code on both sides. The Chain Claw 10 has the ABUS security level 8 and thus offers good theft protection for securing of high-value items such as e-bikes, cargo bikes, e-scooters and pushchairs, for short periods. Thanks to this lock, every outing becomes a safe riding experience.

Technologies

- 7 mm thick and 10 cm long square chain
- Rotating joints and a 55mm diameter engagement point for the cuffs provide maximum flexibility
- The chain as well as parts of the housing and clamps are made of specially hardened steel
- Opening code can be set individually

Operation and use

- Good protection for medium theft risk

Chain Claw 10 black

-
- Recommended for securing bicycles or e-scooters
 - Each clamp can be secured with its own numeric code

Tips

- Good alternative to a chain, as two different objects can be enclosed/secured
