GameChanger TRI champagne gold M

FOR TOP PERFORMANCE

With a shape and features specifically designed to meet the needs of triathletes and hilly time trials, the GameChanger TRI complements the ABUS road product range.

The shorter comb-tail compensates for greater head movement after long hours of suffering on the bike or on inclines. Greater airflow keeps the rider cool on exposed routes without shade and on slower climbs. The aerodynamics are consistent with the included visor or sunglasses. Even the FlowStraps webbing is adapted to fit as tightly as possible, not fluttering and reducing drag. Because a quick change can be crucial in triathlons, the GameChanger Tri is equipped with a magnetic fastener. It closes with just one hand in no time at all. So nothing stands in the way of accomplishing your best result.

Technologies

- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Acti Cage™: allows larger ventilation openings combined with high stability thanks to foamed-in structural reinforcement
- Forced Air Cooling: the ventilation openings are connected to each other via channels on the inside to guide incoming air through the helmet and thus ensure maximum air circulation and a pleasant head climate
- Magnetic visor: visor attached by magnets to protect the eyes from wind, rain and insects – easily removable and replaceable
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size

- Stitched straps: for optimum aerodynamics, the straps are sewn and therefore do not require any strap dividers – this means they fit particularly snugly and do not flap while riding
- Floating Pad: padding on the inside of the helmet, which is clicked into place via several attachment points, making it more flexible and offering better ventilation and greater wear comfort
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Flow Straps™: aerodynamic straps for low flow resistance, less noise and high wear comfort
- Magnetic buckle: the straps are fitted with a high-quality, magnetic FIDLOCK buckle to enable the chin buckle to be opened with one hand, even when wearing gloves
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection
