

FIFTY-FIFTY

Many saddlebags are difficult to access when the rack is full. Not so the ST 5050: Thanks to Velcro fastenings on the front and back, the saddle bag can be opened conveniently on either the right or left side. How it is attached is up to you.

The spacious bag has room for your essential bike accessories. For example, insert chains with a length of up to 130 cm can be accommodated. The water-repellent fabric of the ST 5050 protects the contents of the bag even in poor weather conditions.

Technologies

- Saddle bag with Velcro fastening
- Water-repellent fabric

Operation and use

- Saddle bag for insert chains up to 130 cm long
 - Velcro strap can be attached to the front and back using tabs
 - Depending on how it is attached, the bag can be opened to the left or right
 - Easy access to the saddlebag, even when the rack is full
