

CombiLoop 205/200 black

Seite 1 von 2

Flexible, lightweight, and long

An unsecured helmet on the bike's handlebars or an unattended stroller quickly becomes prey for thieves. With the 200 cm long additional security lock, the CombiLoop 205, objects can be reliably secured.

The steel cable is particularly lightweight at 180 grams and can therefore be taken anywhere. To lock it, you just need to insert the locking bolt and you can protect multiple items from casual theft at once. And it's just as practical to operate without a key. The security cable can be opened using a four-digit numerical code. You can choose any code you like. Thus, recreational equipment, bicycle accessories, or stroller are also well protected.

Technologies

- 5 mm strong steel cable
- Synthetic coating to prevent damage to the bicycle's paintwork
- Automatic locking at insertion of the locking bolt
- Individually settable code

Operation and use

- Additional security to secure accessories
- Ideal for securing leisure or sports gear as well as objects

Tips

- Cable locks stand out due to good flexibility and quite low weight
- The combination lock is very well suited for the use by several people
- Thanks to the flexible and adjustable loops, the total length of two meters can be ideally used and adapted to
