365 Trigger Alarm 2.0 yellow

ARM, BE PROTECTED

The ABUS Trigger Alarm 365 2.0 disc brake lock makes thieves flee with an acoustic alarm signal.

The alarm function is triggered by a vibration detection system. Thanks to the "On/Off" switch, you can also transport the Trigger Alarm 365 2.0 closed - without producing a false alarm. The most security-relevant parts of the lock body are made of hardened special steel. The T-bolt double bolting system prevents attempts to break the lock open by spreading. This bolt anchors itself transversely in the lock body after locking and thus resolutely resists attempts at theft.

The scope of delivery includes the battery for the electronic unit and two keys.

Technologies

- 5 mm locking bolt
- Double bolting thanks to the T-bolt, which anchors itself in the lock body after locking and prevents attempts to break the lock open by spreading
- The bolt, housing and structural parts of the locking mechanism are made of specially hardened steel
- Alarm function based on a vibration detection system
- Alarm function with at least 100 dB
- An "On/Off" position allows the lock to be transported in the closed state without activation
- A special acoustic signal indicates the battery and activity status
- Two keys included
- A CR2 standard battery to power the electronics unit is included in the scope of delivery

Operation and use

- Basic protection where there is a low theft risk
- Recommended for securing light motorbikes and scooters

365 Trigger Alarm 2.0 yellow

Tips

- Disc brake locks are the most compact category of motorbike locks and are therefore easy to transport
- To increase security during longer parking times, it is recommended to also secure the motorbike to a fixed object
