## A Helmet for All Conditions with Crash Detection

Steep climbs, technical single track and all-day adventures : "Down-country" is action-packed, which means the demands on equipment also increase.

Down-country is all about going up fast, down fast and repeating. If a fall happens, the Moventor 2.0 QUIN can save lives. The QUIN technology integrated into the helmet can measure and detect falls. Because the system is linked to an app on the smartphone, a notification is sent to an emergency contact in the event of a fall. The Moventor 2.0 is very well suited to the demands of mountain bikers who feel at home on steep trails. The MTB helmet is lightweight, well ventilated and has a deeper fit that gives more protection at the back of the head. When the trail points downwards, the ten air inlets and nine air outlets provide good ventilation. Thanks to the Zoom Ace MTB adjustment system, the helmet can be individually adapted to any head. This is especially important when riding off-road.

## Technologies

- Lower edge protection: polycarbonate (PC) outer shell covers the lower edge of the helmet and protects against scratches, impacts and signs of wear and tear
- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Reflector Sticker: for better visibility in the dark
- Height-adjustable peak: the position of the peak can be adjusted thanks to locking positions to provide optimum protection from hanging branches and sunlight
- Zoom™ Spin adjustment system: rotary wheel at the back of the head for individual adjustment of the helmet to the head size

Seite 2 von 2

- Trivider™: particularly flat divider with fixed positioning of the straps to prevent unintentional adjustment
- Comfort Pads: soft padded inserts for optimum comfort, attached to the helmet with Velcro
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- Push-in buckle: for safe and practical handling, the straps are fitted with a classic chin lock (three-pronged connection) for opening and closing
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection

## Technical data - Moventor shiny white S lose

Finish	shiny
Fullface	No
Head size	57-61 cm
Peak	Yes
Size	S
Smart - Crash Detection	No
Visor	No
Weight [g]	300 g
backlight	No
color of facets	white, black
design color	shiny white
EAN	4003318685323
