# IVERA Chain 7210K/85 metal blue

CLASSIC SECURITY - CONVENIENT IN EVERYDAY LIFE

Do you rely on tried-and-tested key operation and want to secure your bike flexibly and reliably? Then the IVERA Chain 7210K is the right choice.

Our IVERA Chain locks are the classics among chain locks: easy to handle, versatile and ideal for everyday use. They offer you a balanced mix of security, flexibility and weight - perfect for city bikes and medium theft risk.

The high-quality anti-picking cylinder ensures convenient key operation and reliable protection. As a particularly practical feature, thanks to automatic locking, the lock locks automatically as soon as you insert the bolt - you don't need a key to lock it. The 360° bolt engages reliably from any position and makes it easier for you to secure the bike even in poor lighting conditions or tight connection situations.

The 7 mm square chain made of hardened steel offers solid protection, while the durable IvyTex coating is weatherproof and protects the bike's paintwork from scratches. A proven all-rounder for everyday urban life.

## Technologies

- IvyTex technology: resistant IvyTex plastic fibre coating – particularly functional, weatherproof, flexible and durable
- Square chain: 7 mm thick hardened steel chain
- High-quality anti-picking cylinder: classic ABUS lock cylinder for convenient operation with familiar key principle – two keys are included in the scope of delivery for unlocking
- Automatic locking: locks automatically and without key – simply insert the locking bolt into the lock body, no key

# IVERA Chain 7210K/85 metal blue

is required for locking
- 360° bolt: round steel bolt engages reliably from any position – for greater convenience when locking up the bike, even in the dark
- Solid theft protection: offers good protection with ABUS security level 8 for medium theft risk and is recommended for securing good bikes
- Tried and tested: the lock has been intensively tested for resistance to typical attempts to break it open – using tools such as bolt cutters, hammers or pliers
- Gentle on paintwork: resistant textile coating reliably protects the bike frame from scratches and damage to paintwork when locking up the bike and during transport

## Operation and use

- Lock up flexibly: chain locks are particularly flexible and can be used to lock up bikes in tight spaces or hard-to-reach locations
- Different lengths: the chain lock is available in different lengths – the longer the lock chain, the larger the locking circumference
- Easy to transport: can be wrapped around the bike frame or rolled up and stored in a rucksack, handbag or bike bag

## Tips

- The lock is weather-resistant and insensitive to liquids. This prevents water from being absorbed by the fabric, for example, and protects the locks from corrosion. So there is no reason not to secure your bike in inclement weather for fear of dirt.
- The locks in the IvyTex series are available from specialist retailers in a wide variety of designs.

## Technical data - IVERA Chain 7210K/85 metal blue
