YARDO One 7807/85 black

QUICK UNLOCKING WITHOUT KEY

The YARDO One works without a classic key. Instead, you open it using your smartphone or smartwatch - quick, secure and for everyday use.

Keys were yesterday: you can open this smart chain lock conveniently using the ABUS One app. No more searching for keys, no more tedious aiming at the keyhole, no more stress - especially when things have to be done quickly or are awkward in the dark anyway. Instead, the lock unlocks automatically, the locking bolt moves out and the chain is free. Locking is also very simple: insert the bolt into the lock body and that's it - the automatic locking system does the rest. No more manual locking. For quick and convenient securing of your bike wherever you are.

Available in lengths of 85 cm or 110 cm, the YARDO One offers you a high degree of flexibility for a wide range of applications: from locking to bike racks, lampposts and fences to securing two bikes at the same time. The 7 mm thick round chain offers solid protection for everyday use. A double bolted locking mechanism provides improved protection against forced breaking open.

The IP66 and IP68-certified chain lock is dustproof and weatherproof, making it suitable for daily use in all weather conditions. The flexible chain allows you to transport the YARDO One easily, for example in a rucksack or wrapped compactly around your bike. The robust silicone coating reliably protects the bike paintwork from scratches. It is powered by a replaceable CR2 battery, which is included in the scope of delivery.

You can assign individual access permissions to up to 28 people via the ABUS One app - permanently or for a limited time. All opening operations are logged and can be tracked transparently in the app. Thanks to keyless sharing, the YARDO One is perfect for joint use, for example, by family or friends.
