Visor Hyban 3.0 clear

CLEAR VIEW FOR EVERY RIDE

Customise your helmet with the right visor for every ride: clear vision and protection from insects, glare-free in bright sunlight or automatically tinted in changing lighting conditions. With the visors for the Hyban 3.0 and Hyban 3.0 ACE, you are optimally equipped for all weather and light conditions.

Choose from three variants: "Clear" for optimum visibility at dusk and protection from rain and insects, "Smoke" for effective glare protection in strong sunlight or "Photochromic", which automatically adjusts its tint to changing lighting conditions. Thanks to the practical bayonet fastener, you can attach the helmet visor quickly and without tools, remove it again and simply slide it upwards into a holding position when you don't need it.

Our visors for the Hyban 3.0 and Hyban 3.0 ACE are seamlessly integrated into the helmet design and offer you a clear all-round view in any head position. The flexible adjustment mechanism also ensures high wearing comfort, also for spectacle wearers. At the same time, the visor reliably protects you from wind, dust, rain, snow, insects and intense sunlight.

Stay flexible: the visor can be replaced at any time and can be easily retrofitted. This allows you to customise your helmet - for the best possible protection and comfort on every ride.

Technologies

- Height-adjustable visor: protects the eye area from wind, rain and insects and can be adjusted to different positions
- Compatible design: Visor for the ABUS Hyban 3.0 and Hyban 3.0 ACE helmet models
- Various options: available in Clear (without tint), Smoke (with tint) and Photocromic (self-tinting – automatically adjusts light transmission to the lighting conditions) variants
- Simple installation: visor can be quickly and easily attached to and removed from the helmet using a bayonet fastener
- Suitable for spectacle wearers: visor can be adjusted forwards to create enough space for glasses

Visor Hyban 3.0 clear

- Clear view: the design of the visor allows a clear all-round view at any head angle
- Discreet design: integrates perfectly into the design of the helmet model thanks to its discreet and tried-and-tested visor shape
- Seamless transition: fits perfectly against the helmet and provides protection against insects, dust, wind and rain
- Maximum flexibility: the visor is not a permanently installed component, but can be flexibly attached, removed, replaced and retrofitted
- Robust material: made from hard-wearing polycarbonate
