

SAFELY UNDER LOCK AND SHACKLE

Thieves have no chance against the ABUS GRANIT™ Extreme 59 with a double-locking, 16mm square parabolic shackle.

The shackle and other security-related parts of the GRANIT™ Extreme 59 are made from hardened special steel. An ABUS XPlus cylinder increases the protection offered against tampering attempts such as picking.

When transporting, the GRANIT™ Extreme 59 is incredibly flexible: you can attach it to tubes with a 12-17mm diameter using the SH 59 bracket. Or you can use the M6M Monolock Adapter Plate from GIVI as a fully-integrated mounting option.

Technologies

- 16 mm square parabolic shackle (19 mm with coating)
- Double-locking mechanism securing the shackle in the lock body
- The shackle, the lock body and the structural parts of the locking mechanism are manufactured using specially hardened steel
- ABUS XPlus cylinder for exceptionally high protection against manipulation attempts such as picking
- Two keys are included in the scope of delivery
- Manual cover to protect the keyhole from dirt and corrosion
- ABUS Code Card for additional and replacement keys

Operation and use

- Excellent protection where the risk of theft is high

GRANIT™ Extreme XPlus™ 59/180HB245

Seite 2 von 2

-
- Recommended for protecting high-value bicycles and motorbikes

Tips

- You can order several one-key-fits-all locks. That means that a single key or mechanism can be used for several locks
- U-locks are one of the most difficult lock types to defeat
- The security of your motorbike can be considerably increased by using a connection point (e.g. chain)

Technical data - GRANIT™ Extreme XPlus™ 59/180HB245

Locking type	key
Weight [g]	2600 g
