

SAVES SPACE

We recommend our 82 Titalium™ Monobloc Padlock for hard-to-reach and other special locking areas with a moderate risk of theft.

Some locking areas don't permit the use of a conventional padlock. This may be the case if the area to be secured does not have enough space. We built the lock so that the key fits horizontally from the side. A robust, straight locking bolt and a solid lock body provide the 82TI/70 with high security with low weight. The 12 millimeter thick locking bolt is made of hardened steel. The small space between the locking bolt and the lock ensures that potential lock pickers have no place to stick larger tools, such as bolt cutters.

Technologies

- Solid lock body made from TITALIUM™ special aluminium – high security with low weight
- 12 mm hardened special steel shackle
- A hardened steel pin protects the narrow side of the lock body against sawing
- Precision pin tumbler cylinder with a high number of key differs
- Automatic locking: Locking without key by pushing the shackle

Operation and use

- To secure valuables/goods of medium value or at an average risk of theft
- For special applications, e.g. automats as well as gates, doors, containers, lorries, etc.
- Ideally used with ABUS hasps No. 125 and 130

Variants

- Size: 70 mm

Technical data - 82TI/70
