158KC/45

FIVE MAIN CLOSURES

Our Combination Lock 158KC is recommended if you want to secure moderate valuables or objects.

With a four-digit numerical code, you can use the padlock 158KC to secure your locker for sports, the toolbox at work, or the shed in the yard. All you have to do is remember a four-digit numerical code. In this version - KC for Key Control - the combination lock's integrated master key function ensures that a person at a higher level can use a numerical code to reset all locks with a master key to the code zero-zero-zero. This makes this combination lock reusable, which is a sustainable and cost-saving solution especially for use with lockers in schools, gyms, swimming pools, or other locker rentals.

Technologies

- Solid body made from zinc die-cast
- Shackle made from hardened steel
- 4-digit resettable code
- Disc cylinder - maximum protection against picking
- Lost code can be easily identified and reset by using override key
- Override key sold separately

Operation and use

- To secure valuables / goods of medium value or at an average risk of theft
- To secure doors, gates, cupboards, lockers, tool boxes, cellar windows, sheds, switchboards, etc.
- User operates with individual combination code; Administrator can override combination with master key
