

LIGHTWEIGHT AND SECURE

Secure higher-value items with our 96CS TITALIUM™ padlock.

Whether doors or gates, cabinets or lockers, toolboxes or basements: With this padlock, your valuables are very well protected against theft. The lock body is made of TITALIUM™ special aluminum, which makes the 96CS particularly lightweight, yet robust. The Closed Shackle (CS), i.e. raised lock body, means additional protection for the hardened steel shackle, which makes it much more difficult to break open the lock, such as with bolt cutters. The padlock is opened with a reversible key. This is a quality and safety feature that makes the padlock highly convenient to operate. Because no matter which way you put it in, the reversible key always fits.

Technologies

- Solid lock body made from TITALIUM™ aluminium alloy - high security with low weight
- Hardened steel shackle with NANO PROTECT™ plating for extreme corrosion resistance
- High precision reversible keyway with 150 000 key differs
- Automatic locking: Locking without key by pushing the shackle
- Paracentric keyway for increased protection against manipulation
- CS: shackle guard protects shackle from attack

Operation and use

- To secure valuables/ goods of greater value or at a high risk of theft
- To secure doors, gates, cupboards, tool boxes, cellar windows, sheds, switchboards, etc.

Variants

- Sizes: 50, 60 mm
