

# Ball Valve Lockout

### Stable and Secure

The ball valve lockout device can be used universally and is also applicable for pipes that are hard to reach. The handling is practical and easy, since padlocks can be exactly positioned in one of the many holes of the device.

### Key Features

- Stable and secure, made from powder-coated steel
- Two sizes for most common ball valves
- A number of holes for exact positioning of the padlock gives more stability
- Best used on hard-to-reach pipes
- Holds 1 padlock with up to 7mm shackle diameter

### Areas of Application

- Block access to ball valves during maintenance

Item	#Lock Holes	Max Handle Thickness	Max Handle Width	Shelf Pk Qty	Weight kg
V423	1	7mm	37mm	1	0.091
V426	1	10mm	50mm	1	0.340
