

Gas Cylinder Lockout

Effectively Lock Gas Cylinders

Gas bottles can be locked out directly at the cylinder with this lockout device. This prevents leaking of gas and employees are protected during maintenance work. A sticker can be attached to the device which points out the lockout procedure very clearly.

Key Features

- Made from high-quality polypropylene: long-lasting, robust and non-conductive
- Warning sticker included
- Holds 1 padlock with up to 9mm shackle diameter

Areas of Application

- Block access to gas bottles and connections during maintenance
