

press release

The new flagship of the ABUS reinforced bolt family: the ABUS PR 2800

Wetter / Ruhr - March 2016 - Security expert ABUS offers the retrofittable PR2800 reinforced bolt lock, an enhancement of the proven models of the 1800 and 1900 series. The VdS-approved model impresses with its stable mechanics and its high quality as well as its low-wear metal drive components. The result is that the reinforced bolt PR2800 can be operated extremely quietly and conveniently. A particularly convenient feature is the installation: thanks to a telescopic tubular body, the lock can be quickly adapted to different door panel widths during installation.

Safety, technology and design in harmony.

The new PR2800 reinforced bolt lock from ABUS is as impressive visually as it is technically, in every aspect. With its high quality and low-wear metal drive components, the stable mechanism contributes to improved safety and provides optimum protection against violent intrusion attempts. Thanks to the anchoring on the lock and hinge side, optimal resistance can be achieved. The operation noises have also been optimised and were able to be reduced to a minimum - no matter what material the door is made from. As with previous models, the ABUS PR2800 provides protection in all house, flat and entrance doors across their entire widths, and can be operated from inside and out.

Safe, faster - perfectly equipped for easy installation

For easy installation, the PR2800 reinforced bolt has versatile adjustment possibilities: besides the bolt length mentioned previously, the closing direction can be set, and the key removal can be determined individually. Extensive mounting accessories ensure that the additional safeguard can be easily mounted even in difficult installation conditions. The PR2800 is supplied from the factory as standard with a VdS-approved ABUS door cylinder and an extraction protection rose. The PR2800 is available in white, brown and in stainless-steel-look, and is suitable for door widths of 735 mm - 980 mm or 980 mm - 1200 mm.

The ABUS brand

ABUS has been ensuring a sense of security since 1924. Products from the German quality manufacturer are distinguished by their high level of reliability and durability combined with simple operation. To meet the growing needs of private and commercial users, ABUS offers a wide range of innovative security solutions in the areas of home security, property security and mobile security. The ABUS Group includes ABUS August Bremicker Söhne KG, ABUS Security-Center GmbH & Co. KG, ABUS Pfaffenhain GmbH and ABUS Seccor GmbH. The independent group, headquartered in Wetter (Ruhr), operates worldwide.
