SYSTEM X12R

THE NEW STANDARD

REVERSIBLE KEY SYSTEM

SYSTEM X12R

Highlights

Reversible key

The state-of-the-art key uses dimples instead of sharp-edged cuts for maximum comfort.

Emergency function

It allows the cylinder to be operated from one side even if a key is inserted on the other side of the cylinder.

Anti-drill protection

The X12R is equipped as standard with over 14 hard metal elements per locking side.

One-key concept

Additional cylinders and cylinder types can be supplied for the same key.

Security card

Replacement keys and additional cylinders will only be made upon presentation of the security card.

SKG certificate**

Cylinder specially tested and certified for attack resistance.

TECHNICAL DETAILS

Overview

System:	X12R

* max. patent term to 2030

SYSTEM X12R

In Detail

Reversible key system with horizontal key insertion

Innovative 11+1 opposing pins for high manipulation protection

Stop pin to request locking authorisation for legal and technical copy protection

Over 14 hard metal elements
per each locking side for high
drilling protection

Extra long key neck for
maximum compatibility with
high security escutcheon

SYSTEM X12R

In Detail

The reversible key system with horizontal key insertion offers users maximum convenience.

The shape of the key makes it almost unnoticeable in your pocket.

System X12R comes with a patented* key stopper in both the cylinder and the key.

This verifies that the key has the correct authorisation before opening.

* max. patent term to 2030
