**THIS IS MY
COMFORT ZONE**

NEWLY DEFINED

With our entry into the field of personal protective equipment (PPE), we are transforming our long expertise of cycling and equestrian sport helmet manufacturing and applying it in a new way.

With the help of this helmet expertise, we are able to redefine safety helmets and take them to the next level by raising the bar in terms of comfort and design. Be curious and experience how we apply the tried and tested features of bike helmets to set new standards for industrial and climbing helmets!

NO COMPROMISES WHEN IT COMES TO HEAD PROTECTION

THE “SPECTOR” AND “SCATOR” SAFETY HELMETS

set new standards by merging comfort and design, inspired by proven bike helmet features. The “Spector” premium safety helmet is ideal for working at heights – a sporty industrial climbing helmet that offers extreme comfort and is trend-setting in terms of design. It offers maximum ventilation and a modular side plate for attaching hearing protection or visors, for example, in no time at all. Both work safety helmets are made of robust materials and are designed to fit the shape of the head perfectly so that the helmet does not slip when worn or in the event of an impact.

From a comprehensive range of high-quality accessories, you can choose the equipment best suited to your specific application. Because your safety is our top priority – and that’s something you can feel every time you use it.

PRODUCT OVERVIEW

NEW STANDARDS IN TERMS OF SAFETY AND RELIABILITY FOR OCCUPATIONAL SAFETY!
From safety helmets to eye and face protection to hearing protection, we offer high-quality equipment for your individual protection and comfort.

ABUS SAFETY HELMET
SPECTOR

Discover the future of industrial climbing with our sporty Spector industrial climbing helmet, which offers extreme comfort and is also trend-setting in terms of design. It sets new standards not only for working at height, but also on construction sites and in industrial settings. The Spector is the premium model for your occupational safety. Whether you are carrying out maintenance work on wind turbines or steering the excavator during demolition work – the Spector gives you a new experience of occupational safety.

The safety helmet has a robust ABS shell that offers maximum impact resistance and protection against falling objects. An EPS inner shell optimally absorbs shocks and is extremely comfortable on the head. Thanks to Active Padding and a breathable sweatband, wearing this helmet is comfortable even over long periods of time. An innovative and design-optimized helmet geometry with a low neck area is not only visible from the outside, but can also be felt by the wearer from the inside.

Sophisticated ventilation technology, inspired by our cycling helmet expertise, ensures optimal air circulation. Stagnant heat is prevented and warm air is channeled through the EPS inner shell. Another innovative feature is the EasyFlex adjustment system, which makes the safety helmet multifunctional and individually adjustable by 360°. A rotary wheel enables precise adjustment of the head ring, while an adjustable neck strap with a comfortable back of the head support ensures a perfect and secure fit. A functional eye-catcher: the clips on the front and back of the helmet allow for easy attachment of headlamps and full-vision goggles. A 30 mm wide side slot, known as the Euroslot, enables the attachment of hearing protection. There is also a dedicated slot for securing eye and face protection.

Please note: Use the red buckle for working at height. A black chin buckle is provided for all other activities on the floor. Switching between the two fields of application is very easy: simply replace the chin buckle without having to change the entire strap.

Also available as
SPECTOR-E
for electricians

For industrial work

EN12492
For working at height

ABUS SAFETY HELMET SCATOR

The Scator is a reliable safety helmet, whether on construction sites, in industrial settings, or in gardening and landscaping. It offers reliable head protection and a high level of comfort that speaks for itself.

The lightweight and air-permeable outer shell of the Scator makes it comfortable to wear. Thanks to robust ABS material with high impact resistance, the head of the worker on the ground is reliably protected from impacts and falling objects.

No pressure! The Scator is equipped with a 6-point textile suspension for an optimal fit and a secure hold. Thanks to ABUS PowerTriangle technology, this acts like a suspension system that absorbs part of the impact energy, reduces the energy transferred to the wearer's head, and absorbing pressure or shocks evenly. To prevent the helmet from wobbling and slipping, it has an angled neck strap. An adjustment wheel is integrated onto the strap for individual size adjustment. Additionally, three height settings are available to ensure the helmet can be perfectly adjusted to the wearer's head size.

The helmet is fitted with a short peak so that visibility is not impaired during work. A headlamp holder, slots for visors and face protection, as well as the 30 mm Euroslot for hearing protection are important features for working in a professional environment. This makes the safety helmet modular and it can be fitted with the appropriate accessories depending on the area of application.

cians

P P E : HELMET CUSTOMIZATION

PPE: HELMET CUSTOMIZATION

YOUR HELMET. YOUR LOGO. YOUR IDENTITY.

Make a statement with your company logo on the Spector / Scator – ensuring a strong, visible identity through a unified appearance. Ideally suited for work at height, on construction sites, or in industrial environments. A helmet printed with your logo reinforces your company's presence where it matters most.

We design the helmet according to your ideas – as individual as your company.

IT'S UP TO YOU

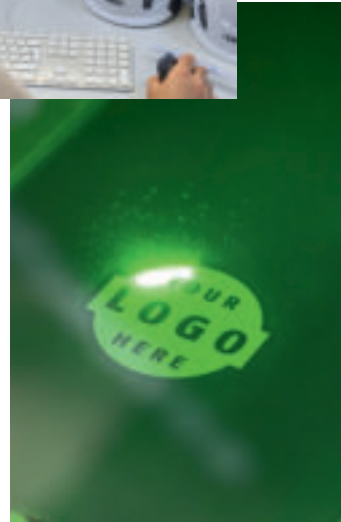

Whether blaze red, core blue, polar white, signal orange, signal yellow, or titanium: Choose the helmet color for your Spector that best matches your company's branding.

You also determine the placement of the logo yourself – on the front, on the side, or in multiple positions simultaneously, according to your preference.

PRINT TEMPLATE FOR APPROVAL

Before the helmets go to print, our team creates a print template that you'll receive by e-mail for approval. As soon as you have given your approval, the helmets can be customized to your exact specifications.

HIGH-QUALITY PAD PRINTING – HOW WE GET YOUR LOGO ON THE HELMET

To customize helmets, we rely on the pad printing process – a tried-and-tested technique that allows even, uneven or curved surfaces such as helmet shells to be printed precisely and cleanly.

First, what is known as a "cliché" is created. This is a print template created with your logo. A soft stamp, also known as a pad, picks up the color from the cliché and transfers it perfectly to the helmet.

We print your logo in two colors – razor-sharp, durable, and highly visible. Different print colors are possible depending on the helmet color. We will be happy to coordinate the right color combination with you.

FAST DELIVERY

If you order between 24 and 96 helmets, we will send your individually printed safety helmets within just 7 working days of print approval. For larger quantities, we'll check the delivery time individually.

The minimum order quantity is 24 pieces. Prices are available upon request.

HERE'S HOW IT WORKS:

- Send us your requests by e-mail or give us a call.
- Please provide the logo file via Adobe Illustrator as .ai or .eps (vector) or as DXF.
- Specify the desired position of the logo and the desired color of the Spector helmet.
- You will receive a print template to approve by e-mail. Production will begin as soon as we receive your confirmation.

HELMET ACCESSORIES

HELMET ACCESSORIES

Half visor

The half visor is like a protective shield for your eyes. It is easy to attach to the helmet, stays firmly in place, and offers reliable protection against splinters and dust – even in extreme temperatures.

Visor protection

Increase the durability of the half visor on the Spector or Spector-E safety helmet with our visor protection. Practical: The slot for attaching a headlamp!

Full visor

Protect your eyes with a full visor, for example when handling saws, cordless grinders, or other mechanical tools. Prevent accidents, wear full visors – that's our motto for occupational safety.

Full visor mesh

You can effectively prevent hazards with the right face protection. This mesh full visor is suitable for work in forestry or gardening and landscaping where objects such as chips or splinters are stirred up.

HELMET ACCESSORIES

Neck protection

Whether in bright sunshine or heavy rain, the neck protector offers the protection and comfort you need to do your work safely and efficiently.

Ear muffs

If you are exposed to high noise levels at work, this earmuff is the perfect addition to your safety helmet.

Chin strap

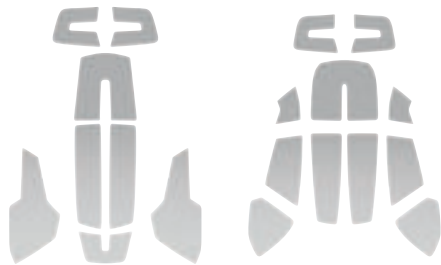

The individually adjustable chin straps ensure that the safety helmet fits perfectly. They ensure that the safety helmet does not slip during action.

Padding set

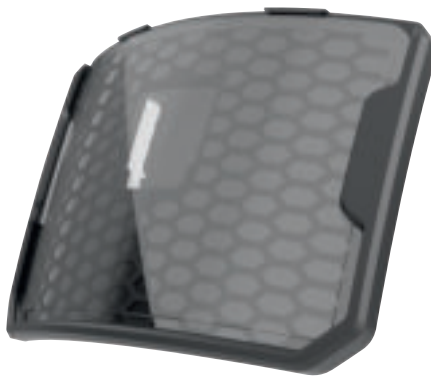

It is placed between the helmet and head like a soft cushion, relieving pressure and ensuring comfort during strenuous work. Available as a set for the Spector and as a forehead pad for the Scator.

HELMET ACCESSORIES

Reflective stickers

Increase your safety at work and in hazardous environments with our reflective stickers for safety helmets. They are a valuable accessory for anyone working in dark or poorly lit areas.

Business card holder

The business card holder allows the helmet wearer to be identified quickly, is easy to attach, and offers effective rain protection.

Safety helmet bag

We offer a matching helmet bag to ensure your safety helmet or goggles stay protected on the way to work or after hours.

Eyewear strap

The flexible ABUS eyewear strap is the solution for anyone who wants to carry their glasses or goggles safely and comfortably. The goggle strap allows safety goggles to be attached for use and worn around the neck so that they are always within reach.

SAFETY GLASSES

SAFETY GLASSES

Ocudo

Whether in intense sunlight or in environments with mechanical hazards – these safety glasses offer reliable protection for your eyes.

Xacto

Our Xacto safety glasses are more than just a necessity for carrying out your work in hazardous areas: you will feel comfortable wearing safety glasses and not worry about your eyes.

Proteo

State-of-the-art full-vision safety glasses that fit perfectly underneath a safety helmet and offer maximum protection and comfort in demanding working environments – that's Proteo.

Dapteo

Eye protection for glasses wearers – generously shaped, these goggles can be worn over conventional glasses, for example for protection during mechanical work.

YOUR KEY TO SUCCESSFUL MERCHANDISING

Use our sales materials for your business. These sales displays are designed to help you present ABUS personal protective equipment effectively and attractively to your customers.
