

Secvest 2WAY Ethernet Module

Art.-Nr. FU8030

Seite 1 von 1

The Ethernet module is an optional add-on module for the Secvest 2WAY. Integrated in the alarm panel, you can use it to send IP-based alarm messages and communicate with the Secvest via the downloader. The Ethernet module is a small, powerful board. It can be quickly and easily plugged into the Secvest.

Technologies

- For IP-based alarm messages
- For worldwide access to Secvest 2WAY (configuration and maintenance)
- In cases of PSTN failure, redundant protocol transmission to a control station using IRIS
- Easily upgraded
- Redundant transfer if PSTN fails

Technical data - Secvest 2WAY Ethernet Module

Connections	10/100 BaseT-Ethernet (RJ45)
Max. humidity	75 %
Max. operating temperature	55 °C
Min. operating temperature	-10 °C
