# Xenon Flashing Light (blue)

ABUS
Security Tech Germany

You can install the Xenon flashing light inside and outside your building. The optical signalling device is a crucial link in a fully functioning alarm chain. At the start of the chain is a detector. In the event of an alarm, the colored Xenon flashing light can be seen over a large distance and flashes at 70 times a minute. The robust plastic housing (IP 54) of the signalling device offers protection against the environmental influences. The flashing light is supplied externally with 12V operating voltage. You can choose between three difference light colors, according to your requirements: red (SG1670), yellow (SG1675) and blue (SG1680).

Technologies

- Including adapter for on-wall mounting
- High flash power
- Can also be mounted on SG1660
- Splashproof
- Protection class: IP54

Technical data - Xenon Flashing Light (blue)

DC voltage supply	12 V
Dimensions	(WxHxD) 175x110x75 mm
Flashing frequency	1,17 Hz
Height	110 mm
Housing material	ABS
IP protection class	54
Installation location	Indoors and protected outdoor areas
Length	75 mm
Light source	Xenon
Luminous colour	Blue
Max. operating temperature	55 °C
Min. operating temperature	-25 °C
Net weight	0,15 kg

Xenon Flashing Light (blue)

Technical data - Xenon Flashing Light (blue)

Power consumption	350 mA
Width	175 mm
