

# Mini Integrated Power Supply

Art.-Nr. TVAC35200

Seite 1 von 1

The stabilized mini integrated power supply (230 V AC / 12 V DC, 1 A) supplies power to your video components. With its compact size it is particularly suitable for installation in 55 mm flush-mounted sockets and wherever little space is available for power supply.

## Technologies

- Stabilized mini switching power supply
- Also ideal for installation in a 55 mm flush-mounted box
- Input voltage: 110 - 240 V AC
- Output voltage: 12 V DC with 1.0 A

## Technical data - Mini Integrated Power Supply

|                   |                             |
|-------------------|-----------------------------|
| Dimensions        | (W x H x D) 48 x 35 x 51 mm |
| Height            | 35 mm                       |
| Input voltage AC  | 110 – 240 V                 |
| Length            | 51 mm                       |
| Net weight        | 0,13 kg                     |
| Operating current | 1.000 mA                    |
| Output voltage DC | 12 V                        |
| Width             | 48 mm                       |
