Unobtrusive and reliable securing of windows and doors

The Secvest mini wireless opening detector is especially compact and discreet. It consists of a detector and a magnet. These components are mounted parallel to each other on the moving part of the window or door and on the window or door frame. The detector triggers as soon as the distance between the two contact points is increased when the window or door is opened and informs the alarm panel. The Secvest mini wireless opening detector is available in white, brown and silver.

Technologies

- Compact, discreet design
