Active intrusion protection for windows and French doors

The VdS-approved FOS 550 E wireless window bar lock actively secures windows and French doors. The dual-point automatic locking system and effective magnetic field sensors prevent intruders from entering with a pressure resistance of up to one tonne and report even the first attempt at opening to the Secvest alarm panel. The Secvest wireless window bar lock is suitable for windows and French doors with turning and tilt-and-turn fittings that open inwardly, and is available in white and brown.

## Technologies

- Active intrusion protection (immediately detects break-in attempts)
- With automatic locking system ("window closed" = "window secured")
- Two locking points with pressure resistance of over one tonne
- Suitable for windows and French doors with turning and tilt-and-turn fittings that open inwardly
