

Indoor IP Compact IR 1080p (3 - 9 mm)

Art.-Nr. IPCA22500

Seite 1 von 2

Ready for use 24/7. For outstanding images.

The IPCA22500 from the Advanced Line of ABUS IP cameras delivers outstanding images indoors with a resolution of 1920 x 1080 px @ 30 fps - even in low light conditions in the evening or at night - thanks to integrated IR-LEDs and the new, more light-sensitive Sony Starvis Exmor R image sensor. Thanks to the outstanding True WDR function (120 dB) of the Sony image sensor and the Sony Xarina DSP, the camera overcomes the extreme challenges posed by backlit situations with ease.

Simple installation. Convenient start-up.

Installation of the camera is much simpler thanks to the Tamron lens with motorised zoom (3.0-9.0mm). Focussing is carried out directly on the laptop, for example. Further installation within the network is carried out in no time at all thanks to the installation wizard.

Protecting images.

The camera has 16GB of internal memory in order to save recordings in the event of a network failure.

The result: a strong and complete solution.

The IPCA22500 is a camera for high standards. It can easily be combined with other ABUS IP cameras and works perfectly with ABUS network video recorders - ideal for projects where strong and complete solutions are needed. Furthermore, integration into existing installations with cameras and recording solutions (Milestone, SeeTec, Synology, etc.) from other providers is possible because of the Open IP principle. The IPCA22500 can be used individually and for a specific purpose to monitor areas in private buildings as well as public spaces (shops, hotels, banks, fuel stations, production halls, etc.).

Technologies

- Full HD 1080p resolution: 1920 x 1080 @ 30 fps

Indoor IP Compact IR 1080p (3 - 9 mm)
