

ABUS Seccor chip key

Art.-Nr. 800012

Seite 1 von 1

The ABUS Seccor chip key is the opening medium for virtually every ABUS door system. It is not just exceptional because of the slim and elegant design; the fixed factory-set coding makes each key unique. The additional cryptologically encrypted dialogue procedure ensures that no authorisations can be copied. The robust stainless steel contact paths ensure enduring comfort during operation for this opening medium, which is designed in line with the reversible key principle.

Technologies

- Electronic chip key with contact paths made of stainless steel
- Robust model with a reversible key principle
- Every ABUS Seccor chip key is unique
- Read and copy protected through cryptologically encrypted dialogue procedure
- Can be used in any ABUS Security-Center locking systems, evaluation units and control units
- Every ABUS Seccor chip key can be used as a programming key

Technical data - ABUS Seccor chip key

Certifications	VdS, class C
Height	5 mm
Length	48 mm
Max. Operating temperature inside	50 °C
Max. Operating temperature outside	50 °C
Min. operating temperature inside	-20 °C
Min. operating temperature outside	-20 °C
Net weight	0.0072 kg
width	30 mm
