

# Outdoor IP Dome IR 1080p (5–50 mm)

Art.-Nr. IPCA72505

Seite 1 von 2

**Special mission:** Detailed surveillance of far away objects in challenging light situations

The IPCA72505, from the Advanced Line of ABUS IP Cameras, is a high-performance outdoor/indoor camera with high-quality hardware components, specially developed for the detailed surveillance of far away objects in challenging light situations.

**True WDR - impressive backlight compensation**

In the entrance areas of hotels, shopping centres and other spacious areas, swift transitions from light to dark make it difficult to properly spot individuals entering the premises. The IPCA72505 features an exceptional True WDR function to compensate for such strong contrasts. Installation is possible at a far distance from the area. In high-rise areas, it is often not possible to install the camera close to the surveillance area. The long focal length of the integrated motorised zoom lens of 5-50mm enables a wide choice of installation locations (easy to focus via the network). Images remain razor sharp. For far away objects, wall mounting is required.

**Robust outdoor surveillance 24/7 - with optimum protection thanks to IP67 and IK10**

The dust and waterproof IP67 housing with IK10 shock resistance provides optimum protection against tampering and vandalism. Integrated IR LEDs provide excellent images both during the day and at night. ABUS IP - a strong and complete solution. Accessories such as the tinted dome for covert surveillance and the large range of mounting brackets mean that the dome cameras are suitable for any application.

## Technologies

- Full HD 1080p resolution: 1920 x 1080 px @ 30 fps
- Ready for use around the clock: excellent image quality in the evening and at night thanks to the new Light-sensitive Sony Starvis Exmor R Image Sensor and Integrated IR LEDs
- Challenge met: the outstanding True WDR function (> 120 dB) of the Sony Xarina DSP and Sony Starvis Exmor R Image Sensor means better images in backlit situations
- Simplified installation: thanks to the motorised zoom lens (5–50 mm)
- Double the security: 16 GB internal memory to store recordings even in the event of a network failure
- Well protected against vandalism (IK10) as well as dust and water (IP67)
