Bell button module (6 buttons) for door intercom

Art.-Nr. TVHS20020

COMPLETELY MODULAR: THE VIDEO DOOR INTERCOM SYSTEM

See people in front of the door, speak to them, open the door. Easy to install, modularly adaptable to any building - corresponding to the number of doorbells required.

ModuVis intercom system expansion by 6 bell buttons
The bell button module extends the ModuVis system (video module and other modules where applicable) by 6 doorbell buttons, e.g. for equipping a block of flats. The buttons are backlit and trim covers are included for buttons that are not required.

Easy installation
The bell button module is simply connected to the video module. This establishes the connection or communication, e.g. to the ModuVis monitor. Depending on the installation frame used, either surface- or flush-mounting are possible.

Fully modular, extensive expansion capability
A clear advantage: Depending on the number of flats and local requirements, additional modules can be simply added to the system. Up to 49 bells are possible (1 video module with 1 button plus up to 8 bell button modules with 6 buttons each), e.g. for a block of flats or a residential complex. One ModuVis touch monitor is integrated for operation in each flat.

Technologies

- Bell button module for ModuVis door intercom system
- Suitable for surface-mounted or flush-mounted frames
