Keypad module for door intercom

Art.-Nr. TVHS20030

COMPLETELY MODULAR: THE VIDEO DOOR INTERCOM SYSTEM
See people in front of the door, speak to them, open the door. Easy to install, modularly adaptable to any building- e.g. with setup of keyless access.

Access without a key - with ModuVis
The numeric keypad module extends the ModuVis system (video module and other modules where applicable) with a keypad for entering a 6-digit PIN code. For keyless access to the building for residents (individual code) or authorised persons (e.g. caretaker with general code). This requires an electronic door opener connected to the video module.

Easy installation
The number keypad module is simply connected to the video module. This establishes the connection to the door buzzer, for example. Depending on the installation frame used, either surface- or flush-mounting are possible.

Fully modular, extensive expansion capability
A clear advantage: Depending on the number of flats and local requirements, modules can be simply added to the system. In addition to a number keypad, several bell button modules are also possible - for up to 49 residential parties. One ModuVis touch monitor is integrated for operation for each party.

Technologies

- Keypad module for ModuVis door intercom system
- Suitable for surface-mounted or flush-mounted frames
- 1 separate PIN code per residential unit (up to 49 PIN codes in the system)
