Frame for 3 modules for flush mounting

Art.-Nr. TVHS20120

COMPLETELY MODULAR: THE VIDEO DOOR INTERCOM SYSTEM
See people in front of the door, speak to them, open the door. Modular, adaptable to any building and easy to install - with the appropriate installation frame.
Discreet flush mounting: your ModuVis installation
When installing ModuVis modules (video module, bell button module, etc.), you have the choice between surface and flush mounting. And you can choose between a 1-fold installation frame (for 1 module), 2-fold frame and 3-fold frame (for 3 modules). This installation frame is suitable for flush-mounted installation of 3 modules.

Totally modular, extensive expansion capability
A clear advantage: Depending on the number of flats or living areas and on-site requirements, modules are simply added to the system, e.g. information module with nameplate, bell button module or number keypad for keyless access via PIN code. If 3 modules are installed, the 3-fold installation frame is the first choice. If 3 modules are planned, but not all of them are used during the initial installation, the 3-fold frame can also be selected and the unassigned part covered with an empty module (dummy cover).

Technologies

- 3-fold frame for flush-mounted installation for the ModuVis door intercom system

Technical data - Frame for 3 modules for flush mounting

Colour	aluminum
Depth	49 mm
Dimensions	124 x 337 x 49 mm
