

Frame for 1 module for surface mounting

Art.-Nr. TVHS20130

Seite 1 von 1

COMPLETELY MODULAR: THE VIDEO DOOR INTERCOM SYSTEM

See people in front of the door, speak to them, open the door. Modular, adaptable to any building and easy to install - with the appropriate installation frame.

Surface mounting: your ModuVis installation

When installing ModuVis modules (video module, bell button module, etc.), you have the choice between surface and flush mounting. And you can choose between a 1-fold installation frame (for 1 module), 2-fold frame and 3-fold frame (for 3 modules). This installation frame is suitable for surface-mounted installation of 1 module.

Totally modular, extensive expansion capability

A clear advantage: Depending on the number of flats or living areas and on-site requirements, modules are simply added to the system, e.g. information module with nameplate, bell button module or number keypad for keyless access via PIN code. If only the video module is installed and no expansion is planned, the 1-fold installation frame is the first choice. If further modules are planned but are not yet used during the initial installation, a larger frame (2-fold, 3-fold) can be selected and the unused part covered with an empty module (dummy cover).
