

FULL BROADSIDE

Telescopic bar with high resistance for securing windows.

Sometimes it just has to be quick: With this telescopic rod, you can increase the security of your windows in just a few simple steps. The telescopic rod is mounted exclusively in the wall soffit, so there is no need to drill into the window. It is therefore suitable for rental flats where the building fabric must not be changed. The telescopic pole is available in lengths of 100 centimetres, 140 centimetres, 180 centimetres and 220 centimetres. It can be shortened to 68 centimetres. The rod is locked with a push button cylinder. It is clearly visible in the window, so it also has a deterrent effect.

Technologies
