SAFETY THROUGH VISIBILITY

Every year, cyclists die from accidents or are injured simply because they are overlooked by other road users.

Especially in poor visibility conditions such as at night, at dusk, in heavy rain or fog, it is therefore extremely important to attract attention as a cyclist. The Urban-I 2.0 signal makes cycling particularly safe in poor visibility and darkness. Its large main reflectors and several additional reflectors, together with the integrated LED tail light, ensure high visibility of the cyclist - during the day and especially at night.

Technologies

- Ponytail Fit: thanks to the opening in the height-adjustable adjustment system, the helmet is also suitable for long hairstyles such as ponytails, buns, or braids
- Removable, washable pads: can be removed and washed by hand or replaced if necessary
- In-mould process: production process in which the inner cushioning material made of expanded polystyrene (EPS) is foamed directly into the outer shell made of polycarbonate (PC) – this creates a durable and robust connection

Technical data - Urban-I 2.0 Signal signal grey XL

Forced Air Cooling	No
Head size	61-65 cm
Helmet type	Urban helmet
Light	No
Ponytail Fit	Yes
Removable pads	Yes
