RSZS316 F1: Aluminum nature

PROTECTION FOR METAL DOORS

Pulling and drill protection for your metal doors.

If door fittings do not fit or do not visually blend into the overall appearance of your door, you can fall back on escutcheon plates. This 16 mm escutcheon plate protects your metal doors against break-in tools, pulling and drilling. Door cylinders that protrude from the door are reliably protected by the escutcheon plate.

Technologies

- Hardened cylinder protection
- For cylinder protrusions of 8 - 15 mm
- Tough special steel alloy plate, rotates freely

Operation and use

- For metal doors
- Protruding EURO-Profile Cylinders should be protected with escutcheon plates

Variants

- Finishes: F1 (alu anodized), F2 (silver anodized), F3 (anodized brass), F4 (anodized bronze), B7 (antique copper), F9 (stainless steel look), W (white)
