AGAINST PULLING AND DRILLING

Secure your wooden door with this escutcheon plate.

If door fittings do not fit or do not visually blend into the overall appearance of your door, you can fall back on escutcheon plates. This 15 millimetre thick escutcheon plate is suitable for wooden doors with a door thickness of 60 millimetres. It embeds the door cylinder like a socket and protects protruding cylinders against breaking off by break-in tools. The use of special steel secures your wooden door against pulling and drilling.

Technologies

- Hardened cylinder protection
- For cylinder protrusions of 8 - 15 mm
- Tough special steel alloy plate, rotates freely
- Suitable for door thicknesses up to 60 mm

Operation and use

- For wooden doors
- Protruding EURO-Profile Cylinders should be protected with escutcheon plates

Variants

- Finishes: F1 (alu anodized), F2 (silver anodized), F3 (anodized brass), F4 (anodized bronze), B7 (antique copper), F9 (stainless steel look), W (white)
