

CONVENIENT, WITHOUT KEY

Universal additional security lock for convenient closing without the need for a key.

You want to secure your aluminium, wooden or plastic windows reliably, but also attach importance to easy mounting and convenient operation? This additional security lock is the solution. The security device is attached to the window frame without drilling into the window wing. Opening and closing is done without a key. The solid steel bolt locks into place by itself. To secure windows and French windows, the angle is folded down manually, then back again to open.

Technologies

- Solid steel bolt for high protection
- Height: 82 mm
- Fitting on the frame only
- No drilling of window or door panel
- Solid fixing and robust construction

Operation and use

- Universal applications
