

MORE SECURITY

Window locks can be reliably attached with this mounting set.

The security of your windows is essential for the protection of your home. But it happens that an additional security lock cannot be attached to your windows reliably enough. This fixing anchor can be the solution. The fixing anchor is mounted in the frame transversely to the profile and enables the robust mounting of an additional securing lock. A special screw gives the anchor a firm hold.

Technologies

- The cross anchor BA is inserted into the wall through the frame profile
- A self tapping screw is provided which after pre-drilling will find support in the cross anchor inside the frame profile

Operation and use

- Reliable pulling resistance, for ABUS locks according to DIN, VdS and SKG
- For PVC or aluminium frame profiles
- Each product needs one fixing set

Variants

- Tools needed: ABUS hole saw for BA = \varnothing 16 mm (order no. 42356-7)/ Torx-bit Tx25

Technical data - BA set of 10
