2130 white

MORE FREEDOM

The additional door lock locks your doors securely and still allows contact to the outside.

You want secure doors and still the possibility to know who is knocking at your door? This additional door lock fulfils these criteria. The lock has a strong door guard and a 5-pin precision cylinder. It is mounted stably, but due to the bracket it offers the possibility to open the door a crack wide. This way you can easily receive mail or simply take a look outside to quickly ward off unwelcome guests. The lock can be unlocked from the inside with a knob and from the outside with a key. Included in the scope of delivery are two of these

Technologies

- Secure mounting
- Stable door guard for partial opening of the door
- Precision 5-pin-tumbler cylinder
- Locks with two turns
- With knob on the inside
- Incl. two keys

Operation and use

- For entrance doors to secure the locking side
- Operated with a key on the outside and a knob on the inside
- Adjustable to DIN left and right doors
