

SECURELY HOOKED IN

Reliable chain for doors with narrow frame profile.

If you have house or flat doors with a narrow frame profile that you want to secure against uninvited guests with a chain, this offers a reliable security solution. The hardened steel chain is easy to fit. Even without drilling into the door panel or frame, it sits firmly and securely. A key is not required. The safety ring is simply and conveniently hung over the door handle.

Technologies

- No need to drill panel or even frame
