

COMFORTABLE AND CONTINUOUS

House and flat doors can be closed comfortably and quietly with this door closer.

Conventional doors like to slam loudly in an unexpected gust of wind. If you want to prevent this in your home, you can rely on this door closer. The closer is suitable for all house and flat doors with a width of up to 1.10 metres. Its closing force is infinitely adjustable and a door opening of up to 180 degrees is still possible after assembly.
