Alarm Cable, 8-core, 100 m

ABUS
Security Tech Germany

The alarm cable is an important utensil for all wired systems. It connects sensors, control and info units to the alarm panel. The alarm cable is very easy to strip. It contains 8 screened cores - all tin-plated and therefore perfectly protected from rust. Every line has a different colour. This makes it easy to connect sensors, control units and info modules to your alarm centre without accidentally confusing individual wires. The alarm cable comes with a cable length of 50m (AZ6360) and 100m (AZ6361).

Technologies

- Corrosion-resistant, tin-coated, flexible wires
- Shielded cables
- 8 × 0.22 mm²

Technical data - Alarm Cable, 8-core, 100 m

Cable diameter	1 mm
Cable length	100 m
Cable type	Alarm Cable, 8-core, 100 m
Certifications	EN 50575:2014
Cores	8
Cross-section wires	0,22 mm²
Diameter	5,8 mm
Diameter cores	0,53 mm
Outer diameter	4,7 mm
Resistance	105 Ω
