PS88 125ml DK/EN

LOCK CYLINDER MAINTENANCE

The right maintenance does the trick: if the lock cylinder is sticking, our lubricant spray PS88 can help. It lubricates the locking mechanism so that the key turns smoothly.

Simply spray PS88 into the lock cylinder and you're done. In the event of heavy soiling, dirt and deposits are dislodged from the lock cylinder and flushed out. It is therefore advisable to have a cloth to hand to catch any dirt that emerges.

As well as use for front doors and apartment doors, the PS88 spray is also suitable for lubricating hinges, bike locks, padlocks, tools and other moving parts.

Technologies

- The information on the product label must always be followed.
- Non-greasy lubricant for the home, hobby and DIY
- The lubricant reduces friction between moving parts and helps the mechanism to run smoothly

Operation and use

- Suitable for door cylinders, bike locks, padlocks, car locks, tools, sports equipment and office machines
- For lubricating squeaky and creaky doors, windows and drawers

Variants

- 50 ml, 125 ml and 300 ml
