

# Bath thermometer JC8730 EMIL analogue

Seite 1 von 1

Splash, splash!

Blow foam across the bathroom and splash water on the aunt: This is what makes bathing really fun!

When bathing, it's all about the right temperature. Because baby skin is much more sensitive than that of adults. And when our ocean-blue bath thermometer EMIL climbs into the green colour range, every child knows that the water is in the feel-good zone: namely between 30 and 38 degrees Celsius. So ideal for splashing around! (And for mopping up, too, of course)

## Technologies

- Measuring range from 0 to 50 °C.
- Without plasticisers (bisphenol A) and mercury

## Operation and use

- Easy recognition of the comfortable water temperature for children by means of a temperature scale displayed in colours

## Technical data - Bath thermometer JC8730 EMIL analogue

Weight	50 g
colour	blue
