

LED light JC6540 LINUS Magnet-Clip

Seite 1 von 2

Twinkle, twinkle!

LED light LINUS with magnetic fastener can be seen up to 150 metres away.

To be safe on the road in autumn, winter, at dusk or in the dark, you need to be visible, especially in road traffic. For example, with our LINUS LED light, which you can attach to your child's school bag, backpack, bicycle or jacket. At the touch of a button, kids can also set whether the four LEDs should shine brightly all the time or switch to flashing light. Thanks to the waterproof exterior, LINUS can also be used in the rain. Tip: To further increase your child's safety, clip LINUS to the tab on the back of our MAX and LEON safety vests. And of course LINUS is also suitable for athletes, bikers, cyclists and others who are out and about at night or in the dark and want to be as safe as possible in road traffic.

Technologies
