

ALWAYS MODULAR. ALWAYS FLEXIBLE.

The Xelus ME master key system can be extended at any time and allows you maximum freedom for development and change.

Back ordering complementary products for your locking system is still possible even after many years. When developing new components, ABUS focuses on reducing the environmental impact of potentially harmful substances such as lead and using forward-looking manufacturing technologies. With Xelus ME you are moving with the future, because the modular housing is completely lead-free and thus already meets the European requirements of the future.
