

# Magtec double cylinder

Seite 1 von 2

## SECURITY AT A VERY HIGH LEVEL

The independent SKG testing institute confirms that ABUS meets this requirement with the Magtec locking system with the highest security class SKG\*\*\*.

The innovative magnetic technology in the cylinder and on the key offers you particularly effective protection against illegal key copying and manipulation of the locking system. This includes, for example, picking and forcible breaking open by drilling or pulling the cylinder core. With Magtec you are ahead of the game in terms of door security - because the profile cylinder housings already meet the European requirements of tomorrow.

## Technologies

- Strong, multi-paracentric key made of wear-resistant nickel silver
- Patent protection
- Trademark protection: Unlimited
- High-quality locking system with up to 32 spring-loaded tumblers and 4 tumbler levels
- Copy protection: Magnetic technology in key and cylinder, with security card (original ABUS replacement keys and cylinders are only produced if the security card is presented)
- Modular construction: standard for double, half and knob cylinders
- Key related security: Class 6 according to DIN EN 1303
- Attack resistance: Class D for Euro profile cylinders
- Fire resistance: Class B, T90
- Product certification: Certified according to DIN 18252 and DIN EN 1303, SKG\*\*\* as standard for Euro profile cylinders, other cylinders on request
